

In the Forest

A forest is a place with many trees.
Some trees have leaves. These are *deciduous* trees.
In autumn, the leaves change color.
They can be **yellow**, **red**, or **brown**.
Then the leaves fall to the ground.
Examples are oak, birch, and rowan.

Other trees have needles. These are *coniferous* trees.
The needles stay green all year.
Examples are spruce and pine

Tasks

- 1) What is a deciduous tree?
- 2) What is a coniferous tree?
